

July 10, 2019 2:30pm.
Teleconference
Paul, Peter, Amerjit, Bernie

(PW) F/U - Not leaving Warnings Creek out of Hydro 6.
• ensure Warnings Creek will not be impacted.

(Amerjit) In touch w John at Melrose who has
• Indicated there would be no impact via email.
- stated that this was the first formal direction from the County that this was a concern. (Warnings Creek)
- stated it wasn't part of the Peer Review.

(PW) - would like affirmation from WSP re: Warnings Creek not being affected.

(Amerjit) - peer review has already been undertaken. whether or not that is included.

(PW) Typical to have follow up(s) on peer review

(Bernie) - Bernie provided synopsis of peer review experience in another municipality
* Bernie - Asked PW to send back table of outstanding items, noting which items County would like additional comments on. - Wants to know what exactly PM and PW would like him to do.

- Looking for a more specific, formal request of requirements.
Amerjit - Needs an RFP or quote → could even be an email exchange.

(Amerjit/Bernie) → Has made amendments to S, R Plan which have not yet been released.

→ Paul confirmed he will forward written requests
~~re:~~ re: comments / requests.

A/B → Preferred timeline is July. August if July not possible. Would like matter to go to Council, second mtg. in August so he can meet his reporting deadline.

PN → noted that PPC meeting is 3rd wed. of month.
* discussion re: PPC vs council *

Bemie: May 20th re: Traffic Assessment Correspondence from Jewell. - he has this.
Please include any relevant information / communication that may have transpired.

2 yr. window is only for Aggregate Application.
↳ (that A. & B. are working with)

PM - notes that entrance not needed to be paved in report. - He would like to see it paved.

* wheel washing wanted - Amerjet → Does not believe it is necessary.

PM - ~~tracking~~ wants to ensure debris does not get dragged onto road.

Amerj → can put asphalt milling on pit side of road as an option instead - WSP could address this.

Amerj → NOT routine to have illumination for class B pits in the province.

Bernie → Will address requested follow up email as soon as its received.

3:04pm - Bernie exited call.

PM → Willing to consider option of asphalt millings as option to replace tire washing.

Amey → Appreciated.

(PW) - Hydros. - monitoring well for water table.
↳ How does this get monitored?

(A) → periodically extract test bits (licencee)
Dig a test pit to confirm next area to dig is above water table.

(PW) How is it reported: to who?

(A) - self monitored. No regulation or guide or what to report results to.

(PW) Will wait for incoming comments before submitting report to MNR? Yes

(PW) → Any interest in importing materials (Green)?

(A) Site Plan says aggregate material would be imported to site. This could be a storage facility.
ie. stone, recyclable concrete,
yes. material coming into the pit via trucks.

(PW) Traffic Report did not address increased traffic due to imported product.

(A) Just the nature of the industry (essentially)

PM- Will there be onsite crushing? Recycling onsite?

A → Yes. As per site plan.

PW- No max. of trucks per day?

A- No. Too difficult to pre-determine.

PM- Job specific.

A- Could project an estimate based on Paul (Green's) years of experience w his business.

Time line for communication (Amorjet requested)

- ~~Ad needs to go out by July 17th.~~

- Report deadline: ~~Aug 9th~~ Aug. 2nd

Amorjet: Requested PW to email timeline milestones/ deadlines that need to be met in order to have all required input for report due Aug. 2nd.

Amorjet will copy Benite on email he is sending PW.

3:27 - ended.
